March 30, 2020

Re: COVID-19 Status and Response

Dear Valued Customer,

In response to the COVID-19 pandemic, Air Comm Corporation is closely monitoring and evaluating potential business impacts to our supply chain in an effort to minimize disruptions to our customers. The recently distributed letter from the Department of Homeland Security dated March 19, 2020, which provides an explanation of qualified critical infrastructure workers under the CISA guidelines, qualifies ACC as an essential manufacturer of products to aviation operations under no less than 4 of the 16 CISA categories:

- Law Enforcement, public safety, and first responders
- Transportation and Logistics
- Critical Manufacturing
- Defense Industrial Base

The present circumstances are unpredictable, and Air Comm will take every step necessary to protect the safety of our employees and their families, and to comply with our legal obligations. However, ACC remains committed to supporting our OEM and aftermarket civil and military manufacturers, repair centers, and operators. It is our intent to continue operations uninterrupted.

More importantly, we hope that you, your families and your employees remain healthy and safe during this unprecedented global event. As always, we thank you for your business and support through the years.

Sincerely,

[Signature]

Andy Wu
President

Air Comm Corporation
